

Cloud One Business Communication Suite Call Centre Solution

Complete Features

Reliable

Easy to Manage

This document outlines the Cloud One Business Communication Suite offerings for call center solutions. Available both in the cloud and on-premises, Cloud One Business Communication Suite offers a complete package for voice, video, chat, call center, messaging and more, out of the box. By integrating market-leading unified communications (UC) and contact center (CC) solutions into a single suite, Cloud One Business Communication Suite helps businesses boost engagement, collaboration, and operational effectiveness for customer success.

Deliver Superior Customer Experience

Built with a customer-centric approach, Cloud One Call Centre Solution surpasses traditional voice routing and management to offer omnichannel messaging support. With a complete list of intelligent features, it provides a user-friendly visual workspace that effortlessly streamlines all your inbound activities.

➤ Key Solution Capabilities

- Inbound Call Center
- Outbound Call Center
- Live Chat & Omnichannel Messaging
- Agent Collaboration
- Quality Management
- Reporting & Analytics
- CRM Integrations & APIs
- High Availability

➤ Benefits

Integrated in your PBX. One low-cost license to let anybody in your company help handle customer queries.

Maximize outreach with automated dialer and easy campaign management tools to boost efficiency.

Seamless working across multiple locations and remote agents.

Resolve swiftly using intelligent routings, design-led interfaces streamlining call center interactions, and unified internal collaboration tools.

Activate agent potential with powerful monitoring, analytics and performance management to identify areas of opportunity and improvement.

Delight customers with the freedom to contact your company over phone, SMS, social media, and more

Reduce IT dependency with everything ready out of the box.

Compliant with data privacy and security standards: GDPR, PCI, ISO 27001, etc..

Drive Efficiency with Easy-first Inbound Tools

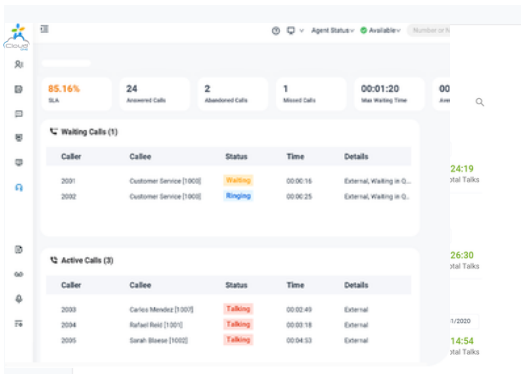

Intelligent Call Routing

Achieve higher first-call resolution using advanced self-service IVR and automatic call distribution (ACD) that routes calls based on priority, agent skill levels, time of day, language preferences, and more.

Queue Panel

The Queue Panel allows agents and supervisors to efficiently manage all aspects of a queue. From agent coaching to call handling, it's your visual, intuitive interface to handle all daily call center operations efficiently through a single interface.

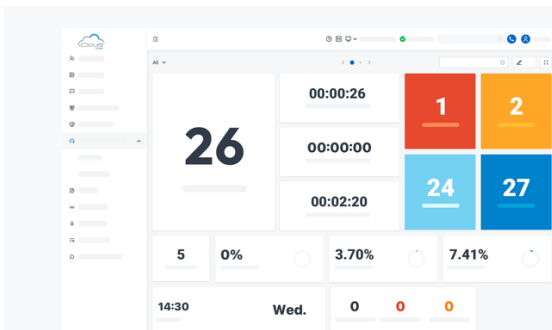

Key functionality:

- Manage agent status: login/out, pause/unpause
- Handle queued calls: drag-and-drop distribute & transfer
- Live agent coaching: click to listen-in, whisper, barge-in monitor
- Track & label missed call processing results
- Display real-time active/waiting queued call list
- Display real-time per agent & aggregated performance data

Real-time Wallboard

The Wallboard aggregates your call center KPIs and metrics into an intuitive display. With real-time performance data per queue and the sum of all queues, you can easily spot the emerging trend at a glance at any time and take proactive actions.

Key functionality:

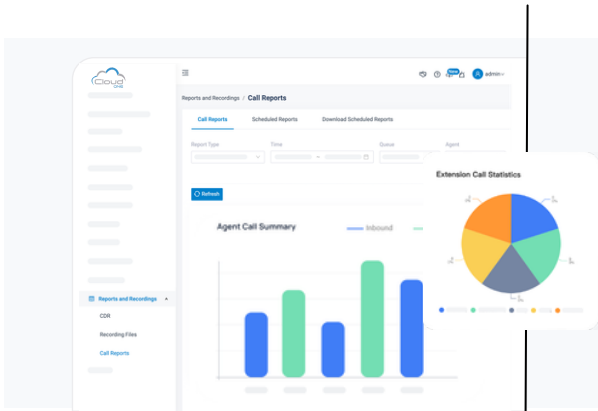

- Visualize 17 key metrics including Missed Rate, etc.
- Track real-time stats of one or multiple queues
- Intuitive widget-based view and informative chart view
- Automatic notification on SLA threshold

Quality Monitoring & Compliance

Record calls for legal and quality monitoring. Train agents live with Listen-in and Whisper and use Barge-in to take over when needed. Ensure every interaction of your agents is up to standard.

Call Center Reports

Gain the business insights needed to maximize agent performance and provide better customer service and run targeted analysis over your call center data.

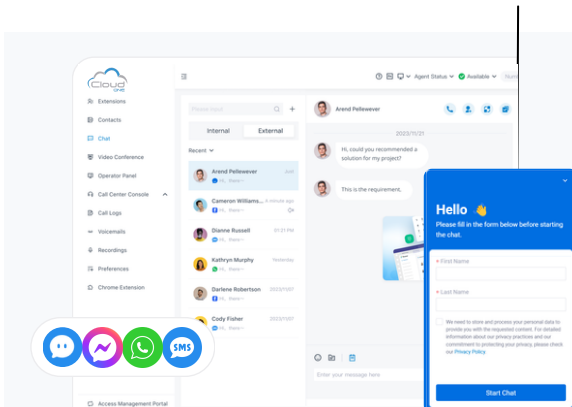

Key functionality:

- 13 customizable reports spanning IVR, Agent, Queue, and Customer Satisfaction dimensions
- Intuitive graphs for greater visibility
- Scheduled periodic downloads

Omnichannel Messaging

Add messaging channels alongside your voice support. Chats from every channel, including live chat, SMS, and messenger, route directly to your inbox for easier prioritization and resolution.

Key functionality:

- Connect Facebook, WhatsApp, SMS and Website Live Chat
- Auto agent assignment, message queues, and chat transfer
- Chat to call in one click
- Automatic contact matching
- Chat logs and Message detail records
- Outbound bulk messaging for SMS and WhatsApp

Pre-built CRM Integrations & APIs

Link the system with your CRM or helpdesk and bring up the customer contact record before you answer that call.

Key functionality:

- Quickly identify who's calling or as messages come in
- Automatic call popup
- Click to call directly from CRM interfaces
- Automatically log calls to CRM records

Reach Customers with Seamless Outbound Calling Capabilities

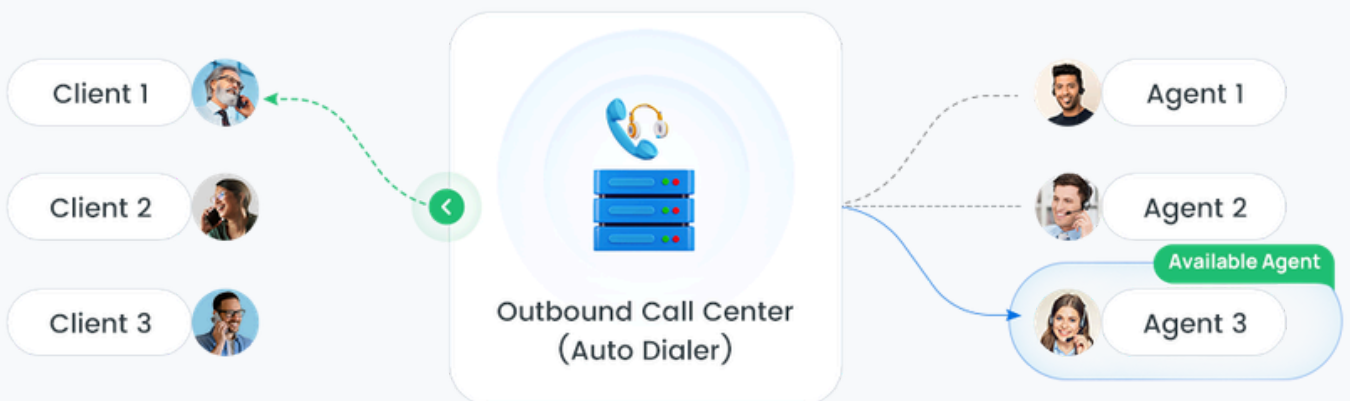

Built-in Auto Dialers:

Automate the dialing process and connect agents a live prospect efficiently. Let your agents handle interactions that require a human touch, while routing the rest to pre-configured destinations like IVR for maximum outreach

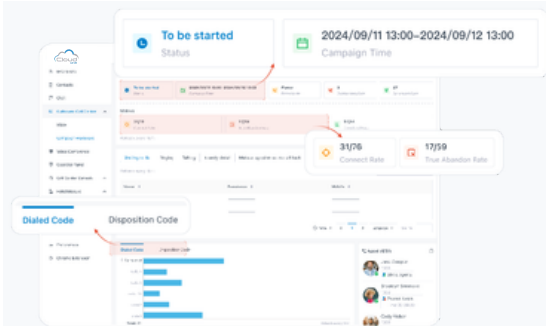

3 Auto dialers for every need:

- Progressive Dialer: Dial on a one-to-one basis to establish high-quality connections between leads and agents.
- Power Dialer: Optimize call volumes and agent availability by adjusting dialing rates to minimize dropped or abandoned calls.
- Agentless Dialer: Connect with customers for simple messages or telemarketing, without requiring live agent availability. This enables rapid outreach to a broad audience.

Real-time Campaign Wallboard

Discover up-to-the-minute outbound campaign performance metrics, detailed dialing logs, and call disposition summary, all from a single, intuitive wallboard. Supervisors can leverage the dashboard to monitor and optimize campaign performance in real time.

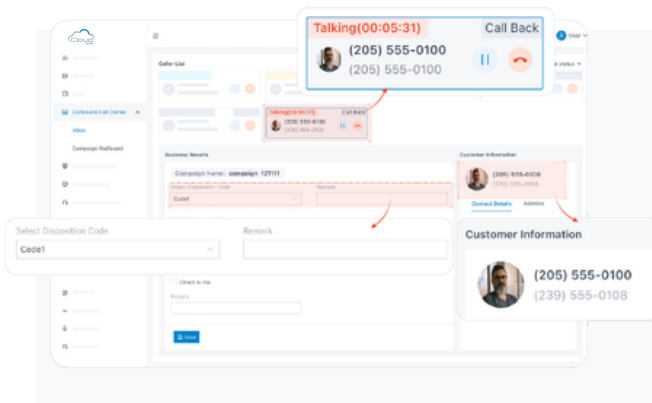

➤ Key functionality:

- Track outbound campaign statistics
- Monitor live KPIs: connect rate, abandon rate, and more
- Visualize dial results & dispositions summary
- Filter and search dialing logs in seconds
- Track queue agents' status in one place

Agent-based Call Inbox

➤ Key functionality:

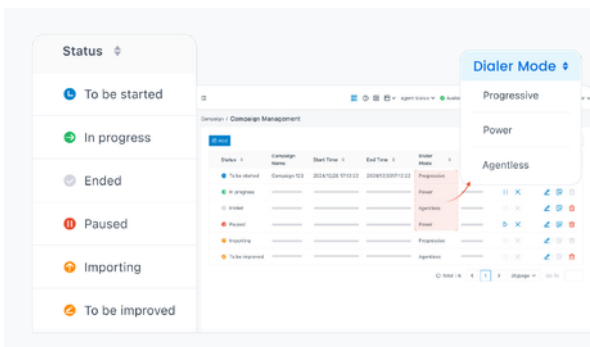

Streamline operations with a unified operation hub for agents, combining complete view of all assigned campaign calls, contact details, call dispositions, and callback schedules in one convenient location.

- View real-time active/waiting calls
- Answer, hang up, or manage assigned calls
- Access detailed customer information
- Label call outcomes and add remarks
- Schedule an automatic callback

Easy Campaign Management

Running outbound call campaigns effortlessly with easy campaign management tools. Enable outbound queue managers to effortlessly create, schedule, and monitor outbound call campaigns.

➤ Key functionality:

- Keep track of all campaigns in a unified list
- Set campaigns: dialing hours, dial mode, DOD, etc.
- Manage outbound queues with ease
- Manage call disposition tags

Integrated Call Center Features

The table below provides an overview of the integrated call center features available in the Cloud One Business Communication Suite Phone System.

Features marked with an * (asterisk) require the Cloud One Business Communication Suite Phone System **Enterprise Plan or higher**.

And please note that the outbound call center is available as an add-on service on **P-Series Software Edition** only.
